Dear Dr. Leachberg,

Many thanks for the phase PLT22 which arrived safely and in good condition, also the enclosed reprints which I appreciate having.

After mailing my last request, I realized that I should have asked for strain TM2 as well. If it is convenient, will you be good enough to forward me this culture.

If I were not committed here, I would welcome the opportunity for applying for a graduate student assistantship in your department. I shall, however, pass the word around for the benefit of interested parties.

Thank you for your good wishes in my studies, and your cooperation which is greatly appreciated.

Sincerely  
W. Robert Barclay
